STRENGTH OF MATERIALS

Numbers 1-6, 1969

(A translation of Problemy Prochnosti)

A

Ablamskii, V. A. - 212
Adamovich, A. V. - 412
Akhremenko, V. L. - 136
Akimov, L. M. - 575
Alekseenko, M. F. - 235, 460
Aleksyuk, M. M. - 206
Alishoev, L. P. - 50, 192
Al'tshul', B. A. - 214
Amel'yanchik, A. V. - 600
Antonenko, V. M. - 183, 258

B

Babei, Yu. I. - 432
Balashov, B. F. - 306
Balina, V. S. - 58
Bashkatova, Zh. V. - 45
Beloivan, A. F. - 519
Bichutskaya, O. V. - 575
Bobritskaya, S. D. - 286, 402, 660
Bogaichuk, V. I. - 500
Bogomolav, S. I. - 340
Borisenko, V. A. - 283, 393, 515, 667
Borisov, S. P. - 113
Borodin, N. A. - 113
Bragina, T. K. - 196
Burlakov, L. I. - 596
Busalov, Yu. E. - 278
Buzunov, V. N. - 478
Bychkov, N. A. - 9
Bykov, I. I. - 519

C

Chaikovskii, B. S. - 235, 460, 634
Chekalin, A. N. - 535
Chemeris, A. N. - 312
Chernyavskii, K. S. - 509

D

Dem'yanushko, I. V. - 130
Dobrovol'skii, G. B. - 258
Dorofeev, Yu. G. - 74
Dreshpak, V. A. - 669
Dubenets, V. G. - 451, 651
Dubinin, V. P. - 254
Dubrovin, V. I. - 340
Dul'nev, R. A. - 9
Dyadchenko, V. T. - 432
Dzhemelinskii, V. V. - 515, 667

F

Filatov, E. A. - 32
Fomichev, V. I. - 225
Fot, N. A. - 107, 318
Fridlyanskaya, N. A. - 336
Frolov, Yu. P. - 491

G

Getsov, L. B. - 249, 327, 487
Gladkovskii, V. A. - 545
Gogosti, G. A. - 104, 258
Golovin, S. A. - 630
Gorodetskii, V. N. - 136, 225, 340, 600
Gorpinich, V. P. - 254
Gracheva, L. I. - 188
Gryaznov, B. A. - 332, 548

STRENGTH OF MATERIALS

Numbers 1-6, 1969

(A translation of Problemy Prochnosti)

Number 1 July, 1969

	Engl.	Russ.
From the Editor	1	3
Development of Research in Strength of Materials at the Academy of Sciences of the Ukrainian SSR during the Past 50 Years – G. S. Pisarenko	4	7
SCIENTIFIC-TECHNICAL SECTION		
Estimating Rupture Resistance in Thermal Fatigue – S. V. Serensen, R. A. Dul'nev, and N. A. Bychkov	9	12
Criteria for Failure of Materials under Cyclic Thermal Loading – G. S. Pisarenko and N. S. Mozharovskii	16	20
A "Scale Effect" in Tests of Long-Term Strength (T) – V. T. Troshchenko	22	26
Analysis of Low-Cycle Durability in Connection with Asymmetry of the Loading Cycle – N. A. Makhutov and V M. Tarasov	27	30
Accumulation of Fatigue Defects at Low Stress Levels – É. A. Filatov, V. É. Pavlovskii, and Yu. A. Panfilov	32	35
Investigation of the Endurance of Aluminum Alloy AMg6M Sheet at Frequencies of 2500, 7500, and 12,500 Hz – L. F. Kul'bashnii	35	38
Methods of Estimating the Strength of Turbomachinery Elements – I. A. Kozlov	39	42
Stress Conditions and Structural Strength of Turbine Rotors – V. P. Rabinovich, V. F. Kozhevnikov, E. D. Konson, and Zh. V. Bashkatova	45	48
Structural Strength of Members of the Roof Connection in Turbine Blading – L. R. Alishoev and N. N. Samarina	50	53
Strength Criterion of Structurally Heterogeneous Materials – A. A Lebedev	54	57
Method of Extrapolating Long-Time Strength – V. S. Balina and G. Kh. Listvinskii	58	61
Creep and Failure of VT8 Titanium Alloy Subjected to Small-Cycle Tension at Normal Temperatures – Yu. A. Kuzema, V. N. Semirog-Orlik, and V. I. Kovpak	63	66
Dislocation Dynamics and Plastic Shear in Crystalline Solids. Communication 1 – A. Ya. Krasovskii	67	71
Mechanical Properties of Nickel Reinforced with Tungsten Fibers – D. M. Karpinos, É. S. Umanskii, V. N. Rudenko, L. I. Tuchinskii, and Yu. G. Dorofeev	74	78
Investigation of the Strength and Plasticity of Technically Pure Molybdenum Exposed to a Programmed Load Variation – V. A. Strizhalo	78	82
Temperature Dependence of Creep and Stress Relaxation – G. F. Lepin and A. P. Tikhonov	81	85
The Problem of a Viscoelastic Tube of Variable Radius under Pressure – B. E. Pobedrya	86	89
Effect of the Scale Factor on the Strength of Brittle Porous Materials – A Ya. Peras	91	93
Investigation of the Stressed State of a Plate, Reinforced with Individual Fibers, by the Optical Polarization Method – E. I. Zaluzhnaya and É. S. Umanskii	95	97
Use of Computers for Solving Axisymmetric Problems in the Study of the Stressed State of Turbine Elements – A. L. Kvitka	100	102
BRIEF COMMUNICATIONS		
A System for Automatic Programmed Temperature Control (PRT-1) – G. A. Gogosti and Yu. N. Lankin	104	105
Use of Thermocouples as Pressure Transducers – N. A. Fot and G. V. Stepanov	107	107

Engl./Russ.

CHRONICLES

Structural Strength of Engines – V. V. Osasyuk 109 110

Anniversary Meeting of the Department of Mathematics, Mechanics, and Cybernetics of the Academy of Sciences of the Ukrainian SSR..... 111 111

Number 2 August, 1969

TECHNIQUES

Evaluation of the Fatigue Resistance of Surface-Hardened Specimens with Residual-Stress Kinetics Taken into Account – S. V. Serensen, S. P. Borisov, and N. A. Borodin 113 3

Developing Methods of Predicting the Fatigue Strength of Metals – V. T. Troshchenko ... 117 7

Fatigue Strength Testing of Turbine Blade Simulators in a Gas Flow – B. N. Sinaiskii 125 13

Computational Methods of Investigating the Strength of Turbo-Machine Wheels – I. V. Dem'yanushko 130 18

Strength of Wheels with Eccentric Holes – V. N. Gorodetskii, I. A. Kozlov, and V. L. Akhremenko 136 23

Bearing Capacity of Reinforced Plastics during Intense Unilateral Heating – G. V. Isakhanov 141 28

Mechanical Properties and Nature of Deformation in Nickel and Titanium Reinforced with Tungsten Wire – V. S. Ivanova, Ch. V. Kopetskii, A. M. Markov, and V. L. Orzhekhovskii 148 35

Short Term Extrapolation of Creep Curves and Stress Relaxations – G. F. Lepkin E. A. Nikiforov, and B. I. Yushchenko 154 40

Durability of Heat-Resistant Materials during Creep with Allowance for the Scale Factor and the Nonstationary Nature of the Conditions – V. D. Kurov and V. D. Tokarev . 158 44

Measuring Nonuniform Deformation Fields by Means of Differential Rasters – O. A. Levin and R. M. Shneiderovich 163 48

Effect of the Degree of Cycle Asymmetry on the Damping of Torsional Vibrations in a Rod – V. V. Khil'chevskii 170 54

Thermal Stresses in Straight Reinforced Plastic Bars Heated on One Side – G. V. Isakhanov, Yu. M. Rodichev, and V. V. Vengzhen 174 58

Estimation of Thermal Stress Level in Cylindrical Samples at Large Heating Rates – Yu. M. Shemegan and V. A. Terletskii 180 64

Temperature Stresses in Thin Disks Made of Materials with Differing Tensile and Compressive Strengths – V. M. Antonenko 183 66

PRODUCTION

Technique for Investigation of Deformation of Surface Layers of Thermally Protective Coatings – G. N. Tret'yachenko, L. V. Kravchuk, V. V. Vdovenko, and L. I. Gracheva 188 71

Strengthening Machine Parts by Plastic Deformation of Their Surfaces – I. V. Kudryavtsev, G. Z. Zaitsev, L. P. Alishoev, S. V. Kudryavtseva, N. M. Savvina, and E. V. Rymynova 192 75

Typical Cases of Failure and Formation of Defects in Gas Turbine Discs – T. K. Bragina 196 78

BRIEF COMMUNICATIONS

Influence of Carbon on the Elasticity and Prolonged Hardness of Niobium at High Temperatures – G. N. Nadezhdin and I. S. Malashenko 200 83

Apparatus for Studying Deformability of Soft Materials under Two-Way Stretching – E. S. Umanskii and S. S. Veremchuk 202 85

An Apparatus for Short Term Tests on Materials – M. M. Aleksyuk 206 88

Engl./Russ.

A Means for Automating Thermocouple Calibration for Low Temperature Measurements – N. V. Novikov and S. I. Likhatskii 209 92
Some Problems in Testing Turbine Machine Parts – V. A. Ablamskii 212 94
Calculation of Internal Friction with a Complex Stress – B. A. Al'tshul' 214 96

Number 3 September, 1969

SCIENTIFIC-TECHNICAL SECTION

Some Problems in the Mechanical Testing of Structural Materials under Neutron Irradiation – G. S. Pisarenko and V. N. Kiselevskii..... 217 3
Trends in Research on the Strength of Stationary Gas Turbines – L. A. Kuznetsov, L. R. Zhits, and N. Z. Suponitskii..... 222 8
The Failure of Turbine Rotor Elements – I. A. Kozlov, V. N. Gorodetskii, V. M. Leshchenko, and V. I. Fomichev..... 225 12
Load-Bearing Capacity of Discs Taking into Account Stress Concentrations outside Elasticity Limits – A. F. Pronkin, I. I. Ostapchuk, and M. G. Kabelevskii 228 15
Calculating the Strength of Packeted Twisted Working Blades of Turbodynamos – M. P. Zyuz'ko, V. P. Sukhinin, and L. A. Shor..... 231 18
Vibration Strength of Turbine Blade Materials – G. S. Krivonogov, V. V. Matveev, I. M. Kachanova, B. S. Chaikovskii, and M. F. Alekseenko 235 22
Damping Capacity of Chromium Turbine Blade Steels – L. I. Ostrovskii..... 239 26
Energy Dissipation in a Glass-Reinforced Plastic during Prolonged Cyclic Deformation – P. P. Oldyrev and V. P. Tamuzh..... 244 31
Parametric Representation of Test Results for Nickel-Base Alloys over a Wide Range of Times and Temperatures – L. B. Getsov and E. V. Rytvinskaya 249 36
Creep of Metals under Extension and Compression at High Temperatures – G. F. Lepin, A. P. Tikhonov, V. F. Gorpinich, V. P. Dubinin, and V. V. Osasyuk 254 41
Determination of Heat Resistance of Inhomogeneous Refractory Materials – G. S. Pisarenko, G. A. Gogotsi, V. M. Antonenko, I. I. Nemets, and G. B. Dobrovol'skii..... 258 44
Several Factors Determining the Strength of Brittle Porous Materials – A. Ya. Peras..... 264 50
Dynamics of Dislocations and Plastic Shear in Crystalline Solids – A. Ya. Krasovskii..... 268 53
Nature of the Bauschinger Effect – V. F. Terent'ev, N. A. Makhutov, V. G. Poida, and A. M. Shcherbak 274 59
Some Mechanical and Physical Properties of Copper Reinforced with Tungsten Wire – V. S. Ivanova, L. M. Ustinov, Yu. E. Busalov, and V. G. Gvozdyk..... 278 64
Trends in the Strength and Hardness of Tantalum at High Temperatures – V. A. Borisenko, V. K. Kharchenko, and V. N. Skuratovskii 283 69
Grid Equations of the Axial-Symmetric Problem of the Elasticity Theory in Curvilinear Coordinates Applied to Turbine Elements. Report No. 1 – S. D. Bobritskaya 286 72
Computation of Penetration Depth of an Undeformable Sphere into a Solid Barrier – G. V. Stepanov..... 292 78
Temperature Field in a Melting Hollow Cylinder – G. V. Isakhanov, V. V. Vengzhen, and V. A. Terletskii..... 296 82

PRODUCTION

Investigation of the Rigidity of Housing Parts and Bushings of the Cylinders of Tractor Diesels – B. A. Vzorov, E. B. Isaev, V. A. Korzhakov, B. S. Mel'nik, and V. A. Osokin..... 299 85

Engl./Russ.

Elevated-Temperature Sensitivity of ÉI437B Alloy to Cycle Asymmetry and Stress Concentration in Relation to Surface Work-Hardening – B. F. Balashov and A. N. Petukhov 306 93

BRIEF COMMUNICATIONS

On the Separation of the Strain Tensor Components Resulting from Transverse Deformation – V. A. Kuz'menko 310 97

An Experimental Investigation of the Dynamic Rigidity of a Cylindrical Casting – A. N. Chemeris 312 99

Magnetostriction Fatigue Tester – A. A. Ivanov 314 101

Fatigue Testers with Half-Wave Magnetostrictive Magnetic Circuits for Testing Aluminum Alloy Sheet – P. F. Kul'bashnyi 316 103

Piezoelectric Properties of Ferroelectric-Ceramic Capacitors during Shock Loading – N. A. Fot 318 105

Number 4 October, 1969

SCIENTIFIC-TECHNICAL SECTION

Energy Criteria for Fatigue Failure of Metals – V. T. Troshchenko and L. A. Khamaza. . 321 3

The Effect of the Tensile Load on the Initiation of Thermal Fatigue Cracks in Gas Turbine Blades – A. P. Voloshchenko, L. B. Getsov, L. V. Kravchuk, R. I. Kuriat, and G. N. Tretyachenko 327 9

Effect of Average Stress Cycle on Stress Concentration in 2Kh13, 1Kh18N9T, and ÉI726 Steels at Normal and High Temperatures – L. A. Kaplinskii and B. A. Gryanov ... 332 15

Stressed-State Investigation of Steam-Turbine Casings and Diaphragms – G. M. Mellerovich, E. N. Pelipenko, M. I. Pokrassa, N. A. Fridlyanskaya, and V. L. Ingul'tsov 336 19

Results of Calculational and Experimental Investigations of the Strength of Thin Gas-Turbine Disks – V. N. Gorodetskii, I. A. Kozlov, S. I. Bogomolov, and V. I. Dubrovin 340 23

Determination of the Critical Brittleness Temperatures of Low-Carbon Steel Sections – S. V. Serensen and N. A. Makhutov 346 29

The Influence of a Reinforcing Ring on the Stress Distribution in Belt Conveyor Drums – G. L. Kalikhman and É. S. Umanskii 356 40

On the Limiting Stressed State of Deformable Solids. Communication 1. Model of an Elastic Solid and Conditions for the Solid to Pass into an Inelastic State – V. A. Kuz'menko 364 48

On the Limiting Stressed State of Deformable Solids. Communication 2. Formulation of Criteria on the Basis of Displacement and Linear Deformations Energy – V. A. Kuz'menko 370 53

Investigation of the Effect of Plastic Deformation on Energy Dissipation in a Material – V. V. Khil'chevskii and B. S. Shul'ginov 381 63

Temperature Dependence of the Modulus of Normal Elasticity of Niobium and Its Alloys – G. N. Nadezhdin, I. S. Malashenko, and A. L. Kuporev 385 67

Strength of Niobium–Molybdenum Alloys at High Temperatures in Vacuo – V. N. Rudenko. 390 72

A Technique for Investigating the Microhardness of Refractory Compounds within a Wide Temperature Range – V. N. Skuratovskii, Yu. G. Tkachenko, and V. A. Borisenko. 393 75

Technique for Investigation of Heat Transfer Boundary Conditions during Study of Heat Shield Layer Breakdown Processes – G. N. Tret'yachenko, L. V. Kravchuk, and V. V. Vdovenko 397 79

Difference Equations in Curvilinear Coordinates for an Axially Symmetric Elasticity Problem as Applied to Turbodynamo Elements – S. D. Bobritskaya 402 83

PRODUCTION

Calculation of Stresses and Deformations in the Value Disk of Internal Combustion Engines – V. P. Kuzhelev and M. A. Saltykov 407 87

Tests on Loading and Mutual Movement of Parts of the Crankshaft and Connecting Rod Mechanism of D-37M and D-50 Tractor Engines – A. V. Adamovich, B. É. Shabshaevich, and V. M. Shiryaev 412 92

Description of an Approximate Method of Designing the Split Connecting-Rod Heads of High-Speed Diesel Engines for Strength and Rigidity, Taking Account of the Action of Variable Inertial Loads Resulting from the Inherent Mass of the Bearing Contour – M. A. Saltykov and A. M. Kazanskaya 416 95

Research on the Durability of Power Chains for Farm Machinery – Yu. A. Vlasov 421 99

Experimental Investigation of the Structural Strength of the Lens-Type Compensators of Gas Turbine Installations – A. I. Kartsev 424 102

BRIEF COMMUNICATIONS

High-Frequency Fatigue Testing Machine with Quarterwave Magnetostrictive Vibrator – G. S. Pisarenko and P. F. Kul'bashnyi 428 106

An Apparatus for Long-Term High and Low Temperature Testing of Brittle Nonmetal Materials – V. G. Soluyanov 430 108

Change in the Impact Strength of Hardened 40Kh Steel during Strain Aging – Yu. I. Babei, R. G. Moiseev, and B. T. Dyadchenko 432 110

Preventing Contact Corrosion Failure during Fatigue Tests on Sheet Aluminum Alloys – P. F. Kul'basnyi and I. S. Sulik 435 113

CHRONICLES

Problems of Energy Dissipation with Oscillations. VII Conference on Problems of Energy Dissipation with Oscillations of Mechanical Systems (December 17-20, 1968) – V. V. Matveev and A. P. Yakovlev 437 115

Questions of the Strength of Engines. Scientific-Industrial Meeting on Problems of the Strength of Engines (April 14-17, 1969) 444 121

Number 5 November, 1969

SCIENTIFIC-TECHNICAL SECTION

Computation of Elastic Systems Oscillations Taking into Account Amplitude and Frequency Dependent Energy Dissipation in the Material – G. S. Pisarenko, V. V. Khil'chevskii, and V. G. Dubenets 451 3

Damping Properties of Martensitic Stainless Steels – G. S. Krivonogov, V. V. Matveev, I. M. Kachanova, B. S. Chaikovskii, and M. F. Alekseenko 460 10

The Frequency Dependence of Energy Dissipation in Metals at High Stress Amplitudes – V. A. Kuzmenko 465 15

Some Results of the Study of True Energy Dissipation in Heat-Resistant Nickel-Based Alloys – G. E. Vizerskaya 469 19

Generalization of the Relationships Describing the Mechanical Hysteresis Loop – V. V. Khil'chevskii 472 22

Method of Investigating the Elastic Properties and Internal Friction in Materials during Continuous Temperature Variations – A. F. Voitenko and N. V. Novikov 475 25

Effect of Operating Loads on the Stress Relaxation in Fastening Pieces of Threaded Joints – G. F. Lepin, V. N. Buzunov, and V. N. Savenkov 478 27

Method of Evaluating the Performance of Heat-Resistant Materials – Ch. G. Mustafin . . . 482 30

Cyclic Creep and Relaxation of Heat-Resistant Alloys – L. B. Getsov 487 34

	Engl.	Russ.
Influence of the Scale Factor on the Long-Term Strength of Kh18N9T Steel – A. A. Klypin, V. D. Kurov, G. P. Mel'nikov, and Yu. P. Frolov	491	39
Experimental Study of Deformation Laws in Carbon Steel in the Complex Stressed State at Low Temperatures – G. S. Pisarenko, A. A. Lebedev, and V. P. Lamashevskii	494	42
Measurement of Strain in Metals at Low Temperatures – N. V. Novikov, S. I. Likhatskii, and V. I. Bogaichuk	500	48
Dislocation Dynamics and Plastic Shear in Crystalline Solids. Communication 3 – A. Ya. Krasovskii	505	53
Formation of Dislocation Substructure and Hardening Mechanism in Cyclic Strain of FCC Metals – K. S. Chernyavskii	509	57
Temperature Dependence of the Hardness of Titanium, Zirconium, and Hafnium Carbides – M. S. Koval'chenko, V. V. Dzhemelinskii, and V. A. Borisenko	515	63
Effect of Scale and Temperature Dependence of the Strength of Basalt Stone Castings – A. F. Beloivan, I. I. Bykov, and A. N. Pilyankevich	519	67
Hypervelocity Projectile Impact in Semi-Infinite Targets – G. V. Stepanov	523	71
MANUFACTURING SECTION		
Bearing Capacity of Semi-Open Radial-Flow Turbine Wheels – Ya. M. Gusak	529	76
Method for Calculating Tapered-Sealed Flange Joints – M. Ya. Kodner and A. N. Chekalin	535	82
Calculation of the Multi-Bearing Crankshafts of Traction Diesels – L. D. Kotel'nikov	540	87
Estimating the Fatigue Limit of Alloy VT3-1 after Mechanical Treatment – Yu. I. Rak, G. S. Yakovlev, A. A. Yakimov, V. A. Gladkovskii, and M. L. Zinshtein	545	92
Effect of Thermal Treatment Conditions on the Strength of Steel 1Kh13 – L. A. Kaplinskii and B. A. Gryaznov	548	95
BRIEF COMMUNICATIONS		
Method of Recording Cyclic-Strain Diagrams of Metals over a Wide Range of Loading Frequencies – V. T. Troshchenko, L. F. Shestopal, and V. A. Strizhalo	551	98
Use of Optically Sensitive Coating Method for Studying the Stressed State of Rotating Discs – L. V. Rogozina	554	101
Apparatus for Mechanical Tests on Heat-Resistant Plastics Subjected to Uniform Unilateral Heating – G. V. Isakhanov and Yu. M. Rodichev	557	105
Creep-Induced Damage to D16T Duralumin – B. S. Shul'ginov, I. A. Troyan, and V. N. Semirog-Orlik	560	107
High-Sensitivity Capacitive Vibration Pickup – I. S. Sulik and A. D. Shevchuk	562	109
CHRONICLES		
The Second International Conference on Fracture – Yu. N. Rabotnov and V. S. Ivanova	563	111

Number 6 December, 1969

	Engl.	Russ.
SCIENTIFIC-TECHNICAL SECTION		
Determination of the Stress – Rupture Characteristics of Heat-Resisting Materials with Long Operating Lives – I. I. Trunin	569	3
Some General Laws of Resistance in Heat-Resistant Alloys under Variable Loads – N. M. Sklyarov, N. I. Kononchuk, L. M. Akimov, B. N. Vasil'ev, N. D. Zhukov, Yu. A. Lapitskii, and O. V. Bichutskaya	575	9

	Engl.	Russ.
Effect of Structure and Purity on the Delayed Fracture Parameters of Copper and Nickel at High Temperatures and Stresses – B. A. Movchan and L. M. Nerodenko	580	14
A New Technique for the Approximation of the Stress – Rupture and Creep Properties of Heat-Resisting Materials – V. I. Kovpak	585	19
A Method of Extrapolating the Long-Term Strengths of Heat-Resistant Materials – V. I. Kovpak	592	26
Equivalent Tests of Aircraft Engines – I. N. Shkanov, L. I. Burlakov, A. A. Kovalev, and V. P. Yurikov	596	30
A Study of the Strength of Discs with Blades Made in the Form of Conical Casings – V. N. Gorodetskii, A. V. Amel'yanchik, V. T. Lapteva, and I. A. Kozlov	600	35
Failure Mechanism of 30Kh Steel under Static and Varying Loads – V. A. Kulikov and L. V. Muratov	605	40
Fatigue Failure of Type 45 Steel during High-Frequency Loading with an Asymmetric Cycle – N. L. Pozen, B. A. Lyashenko, and V. N. Semirog-Orlik	612	46
Failure of Boiler Steel Subjected to Low-Cycle Loading and Variable Temperature – G. A. Tulyakov and V. A. Plekhanov	617	51
Investigation of Deformation and Failure of Aluminum Alloy in a Combined Stress State at Low Temperatures – V. P. Lamashevskii, A. A. Lebedev, and N. V. Novikov	621	54
Remarks on the Connection between the Dissipation of Energy and the Fatigue Strength in Previously Deformed Materials – B. S. Shul'ginov and V. V. Khil'chevskii	627	60
The Effects of Temperature on the Energy Dissipation by Vibrations in Certain Metals – M. A. Krishtan, S. A. Golovin, and N. M. Rostovtsev	630	63
Effect of Static Tensile Stresses on the Damping Properties of Turbine Blade Materials during Bending Oscillations – V. V. Matveev, G. S. Krivonogov, B. S. Chaikovskii, and I. M. Kachanova	634	67
Anisotropy of Internal Friction in Steel after Thermomechanical Treatment and Cold Plastic Deformation – O. N. Romaniv and N. L. Kuklyak	638	71
Study of the Effect of Static Stresses on the Damping of Oscillations in a Magnetic Field – V. V. Khil'chevskii and Yu. D. Ovsyannikov	643	76
Determination of the Young's Modulus Defect of Metals with High-Frequency Vibrations and Large Stress Amplitude – I. S. Sulik	647	80
Experimental Investigation of the Stability of Cylindrical Shells with Stiffening Rings under the Action of External Pressure – Yu. V. Shekhtman	650	83
Free Vibrations of a Multilayer Plate with Dissipative Layers – V. G. Dubenets	656	89
Stress State of Thick Wall Toroidal Shell under Various Forms of Loading – S. D. Bobritskaya	660	93
BRIEF COMMUNICATIONS		
Some Questions on the Choice of Materials for Indentors for High-Temperature Microhardness Testing – V. N. Skuratovskii, V. V. Dzhemelinskii, and V. A. Borisenko	667	100
Elastic Properties of Tungsten and Molybdenum Single Crystals – V. A. Dreshpak	669	102
Temperature Dependence of the Plasticity and Strength of Erbium – L. D. Sokolov	671	104
BOOK REVIEWS		
G. S. Pisarenko and A. A. Lebedev – The Resistance of Materials to Deformation and Failure in Composite Stress – Reviewed by V. N. Kiselevskii	673	106
